XXS

New TOUCH SCREEN - with new Great Functions

XXS series is an extremely Compact Regen Oven.

Just 55cm width and 56cm depth* can be installed into a standard domestic furniture. (* measured form chamber frame to the back panel)

The New capacitive touch screen is user friendly, easy to use but with a lots of new functions.

Also the power is changed, the new Retherma 6 and 10 trays have an increased **temperature range: 30°/ 210°C**

The **QR code function** allows to set all the regeneration process just reading a QR code or a Bar code, no skilled people are needed and all the process is under control.

Climachef, USB and core probe as standard (on GRE) gives a full control on regeneration cycles.

WI-FI CONNECTED

Water Drawer System as optional: Water fill and Waste water in one single optional. 4 L. Water capacity is a great feature when you don't have water connection available on site.

Water Drawer System as to be ordered with GRE model.
